Referral Guide

Helping your patients sleep better is as easy as following a recipe.

You just need all of the proper ingredients. At Sleep Apnea Treatment Centers of America (SATCOA), we recognize the challenges of finding effective and sustainable treatment options for your patients who might be suffering from sleep apnea. Therefore, we have created the recipe and gathered all of the necessary items you might need at your disposal to help your patients get a much needed, restful night of sleep.

Ingredients:

- Includes information about SATCOA, patient screening and our unique patient relations process.
- Procedural details on our unique treatment option that cures patients along with our success statistics.
- Frequently asked questions geared toward you, the referring physician.
- Patient-facing brochure that you can share with anyone who would like more information about SATCOA, and our treatment alternative to the non-compliance often found with the traditional option of continuous positive airway pressure (CPAP) therapy.
- For your convenience, there is a sample of our patient referral form. You can either download additional copies from the link featured in the FAQs or call one of our medical concierges to request more forms.
